This is a provisional appointment pending a future civil service exam. This is a highly skilled position responsible for performing master level equipment mechanic work. In addition, the incumbent supervises subordinate skilled mechanics and other garage personnel in the repair, maintenance and modification of highway construction and maintenance equipment. This position differs from Equipment Mechanic Supervisor I in several ways including a higher overall level of mechanic repair skill, the direction of more complex repair activities, and in assisting the Garage Superintendent in additional administrative and supervisory duties. The work is performed under the general supervision of the Garage Superintendent with considerable leeway allowed in the planning and supervising of work activities. General supervision is exercised over subordinate technical employees and shop personnel.
