For some questions, you will be given information in two or three sentences followed by four restatements of the information. You must then choose the best version. For other questions, you will be given paragraphs with their sentences out of order. You must then choose, from four suggestions, the best order for the sentences.

**Fundamentals of PC systems**

These questions test for knowledge of basic concepts and terminology related to PC's. They cover such topics as PC and peripheral equipment; storage media; types of software used with PC's; and other associated terms and concepts.

**Use and operation of PC's and related peripheral equipment**

These questions test for knowledge and skill in working in a user support situation. They cover such subjects as how to communicate effectively with users requesting help; how to deal with different types of situations; troubleshooting techniques; and how to gather, organize and make available technical information needed to provide support.
