For other questions, you will be given paragraphs with their sentences out of order. You must then choose, from four suggestions, the best order for the sentences.

Understanding and interpreting written material

These questions test for the ability to understand and interpret written material. You will be presented with brief reading passages and will be asked questions about the passages. You should base your answers to the questions **only** on what is presented in the passages and **not** on what you may happen to know about the topic.

Arithmetic computation with calculator

These questions test for the ability to use a calculator to do basic computations. Questions will involve addition, subtraction, multiplication and division. You may also be asked to calculate averages, to use percents, and to round an answer to the nearest whole number. **You should bring with you a hand-held battery- or solar-powered calculator for use on this test.** You will **not** be permitted to use the calculator function of your cell phone.

Principles and practices of purchasing

These questions test for candidates' knowledge of the principles guiding governmental purchasing operations and the ability to put them into practice. These questions may deal with but are not necessarily limited to such matters as the analysis of bids, the use of specifications, the award of contracts, the analysis of market factors that can affect the cost of a purchase, and the application of a set of rules to determine how to proceed with a purchase. Some arithmetic computation may be necessary. No specific knowledge of NYS purchasing laws, rules and regulations will be required to answer these questions.
